ARCTANK® II

Ideal small, family aquarium

The Arcadia Arc Tank is the attractive compact aquarium kit for the novice or experienced aquarist.

The ideal size for the living room, kitchen or even a bedroom the Arc Tank contains all of the hardware you need for keeping coldwater fish such as goldfish, freshwater shrimps, and with the addition of a heater (included on 60L models) is ideal for a small tropical or planted aquarium.

The Arcadia Arc Pod and Ellipse lights provide excellent light distribution and use our specially formulated compact fluorescent lamps to keep aquatic plants healthy and encourage growth, while bringing out the spectacular colours of coldwater and tropical fish.

The striking open top design allows unrestricted views into the tank and creates a more appealing open habitat that allows the owner to feel closer to their fish.

- Supplied with power filter, light unit and removable toughened glass lid with feeding hole
- Contemporary design with silver paint and satin aluminium trim finish
- High quality 5mm glass construction
- Incorporates the new Ellipse lamp light units
- 60L model supplied with 50W Classica Heater
- Full range of spares and accessories
